ATR Industrie-Elektronik: Expertise in two specialist fields

Hannover/Krefeld, March 2022: ATR Industrie-Elektronik GmbH has expertise in two specialist fields: Switchgear manufacture and MCA technology & electronic development. At the Hannover Fair 2022, the Krefeld-based company will present its know-how for the eleventh time at the German Pavilion - North Rhine-Westphalia as a supplier of a wide variety of industrial sectors. This year, especially under the theme „Transforming Industry Together“ the key driver of industrial change in our times

The business segment "Switchgears" focuses on the production of switchgears and control systems for plants and systems in the industry. ATR is authorized for UL_ and cUL approvals/inspections and manufactures switchgears according to IEC / EN / DIN / VDE / NFPA / CSA / CCC / EAC and similar standards with a total length of over 6,5 km per year — also on contract manufacturing.

This is complemented by the second segment "MCA technology & electronic development" in which the company offers numerous immediately usable standard components as isolating amplifiers, measuring amplifiers and control technology. In addition, ATR Industrie-Elektronik GmbH develops solutions in interface technology as well as in analogue and digital signal processing.

ATR has offered know-how and expertise in electronics development for the measurement and control technology for over 50 years. In the areas of retrofitting and redesign of electronic assemblies ATR - as reliable partner - will simplify your life and work — no matter whether it is in the automobile industry, the medical technology field or any other industry.

ATR at the Hannover Fair 2022:

Hall 11, Stand B13 (German Pavilion — North Rhine-Westphalia)

ATR Background:

ATR Industrie-Elektronik GmbH has expertise in switchgear manufacture and MCA technology. Founded 1970 in Viersen/Germany ATR is member of the internationally operating Siempelkamp Group of Companies since 1988. In 2007 the company relocated its site from Viersen to Krefeld. Further to the traditional fields machine and plant engineering, cooling or energy industry more and more customers out of other branches benefit from the ATR know-how and portfolio.
